

LAPTOP LINK FOR MEETING ROOMS

LOGITECH SWYTCH

With a single USB connection, Logitech Swytch links a laptop to the room's display, camera, and audio devices. Now, people can use meeting rooms with any video conferencing software, webinar platform, or streaming service.

JOIN ANY MEETING FROM EVERY ROOM

Logitech Swytch is a BYOM (bring your own meeting) laptop link for video conferencing in meeting rooms, linking a Windows® 10 laptop, MacBook®, or Chromebook to the room's AV equipment with a single USB Type A or C connection.

Swytch works in rooms outfitted with a dedicated computer or an appliance based conference camera that run video conferencing applications — including Microsoft Teams Rooms and Zoom Rooms — and in BYOM rooms equipped with a only conference camera and display. Simply connect Swytch to the laptop via USB and launch the desired application to enjoy broadcast-quality video and content sharing at up to 4K resolution.

With a one-cable laptop link to a meeting room's AV devices, Logitech Swytch makes every room ready for any meeting.
