RGB gaming headset GH-9A

CND-SGHS9A

5291485010454

Light 'em up with the all-new Canyon Gaming headset – Darkless GH-9A! The high-precision 50mm speaker drivers deliver a vivid sound field, so you'll feel right in the middle of the action. Thanks to the comfortable headband and luxurious ear cushions, you can wear them for hours without any discomfort. Volume wheel control allows tactile adjustment with no distraction from the game.

Hold on, we're just getting there. Canyon Darkless features an eye-catching RGB backlight of the headset that goes across the headband, too. You'll dispel any darkness, we can give you that! And with its omnidirectional microphone on a flexible gooseneck, you'll be able to communicate clearly with your teammates and coordinate your strategies like a pro.

So why settle for the mediocrity of other headsets? Upgrade to Canyon Darkless gaming headset today and experience the battle like never before!

# FLAWLESS SOUND

These 50mm speaker drivers are something you should hear. Everything happening in the game will be delivered right to your ears with the highest precision and ultimate sound quality.

## COMFORTABLE AND EASY TO USE

The softest cushions and elastic headband make this headset feel barely perceptible while wearing it. The omnidirectional microphone is mounted on a flexible gooseneck, meaning you have a lot of adjustment to ensure the perfect fit. The dedicated volume wheel allows you to control your audio effortlessly.

# RGB LIGHTING

Stunning RGB lighting frames the headband and the headset body. You'll shine through the darkness and in-game, too. The mic also has a white LED indicator.

# CONNECTION

The headset features a double connection: connect the USB cable to your computer to experience the fantastic RGB lighting. Then, plug it into a 3.5mm jack or use a splitter in case you need to connect microphone and audio separately — we added it to the package.
