

RECHARGEABLE WIRELESS MOUSE MW-44

Meet the newest addition to our wireless mouse lineup – Canyon MW-44. This mouse is triple-mode wireless: it has a classic 2.4 GHz connection and double-channel BT 5.0.

With double-channel Bluetooth, you can connect it to two devices at once and switch between them seamlessly.

Six buttons will cover all your needs – either business or gaming. The switches here are ready to work for at least 3 million clicks. It looks fresh and neat with a multicolored backlight and seven lighting modes.

In terms of tech specs, this Canyon mouse has a Pixart optical sensor with three sensitivity levels up to 1600 DPI. The mouse is powered by a rechargeable 500 mAh battery so that you can forget those pesky AA batteries.

Recharge it in just two hours with the 80cm Type C cable we included in the package. There's a blue light for charging indication.

Get the most out of your wireless mouse. Get your Canyon MW-44 today!

TRIPLE MODE WIRELESS

Canyon MW-44 is triple-mode wireless with a classic 2.4 GHz and double-channel BT 5.0. Use the latter to switch between two connected devices seamlessly.

DESIGN AND BACKLIGHT

Available in fresh blue & yellow, this mouse is quite a looker!

Six buttons will cover all your needs, worry-free for at least 3 million clicks. Its sleek body benefits from the multicolor backlight with seven modes to choose from.

LONG BATTERY LIFE

MW-44 boasts a built-in 500 mAh battery. With energy-saving features, it's a massive reserve of energy, no matter how long your day will be.

RECHARGEABLE

A Type C port allows you to charge this mouse on the go and monitor the process via a designated indicator. It is so convenient that you will never look back to those ancient devices with alkaline batteries.
