HEALTH MONITORING

Keep track of your body temperature for early detection of potential health issues. Monitor your heart rate throughout the day to assess your overall health and fitness. Easily measure your blood oxygen saturation levels to ensure optimal oxygenation.

A man with a beard and short hair, wearing a dark grey sleeveless t-shirt, is smiling and looking to his left. He is wearing a smartwatch on his left wrist and a black arm-mounted device on his right arm. He is standing in a gym, with a treadmill visible in the foreground and other gym equipment in the background. The background is slightly blurred. On the left side of the image, there are several yellow geometric shapes (parallelograms and rectangles) and a yellow line forming a partial frame.

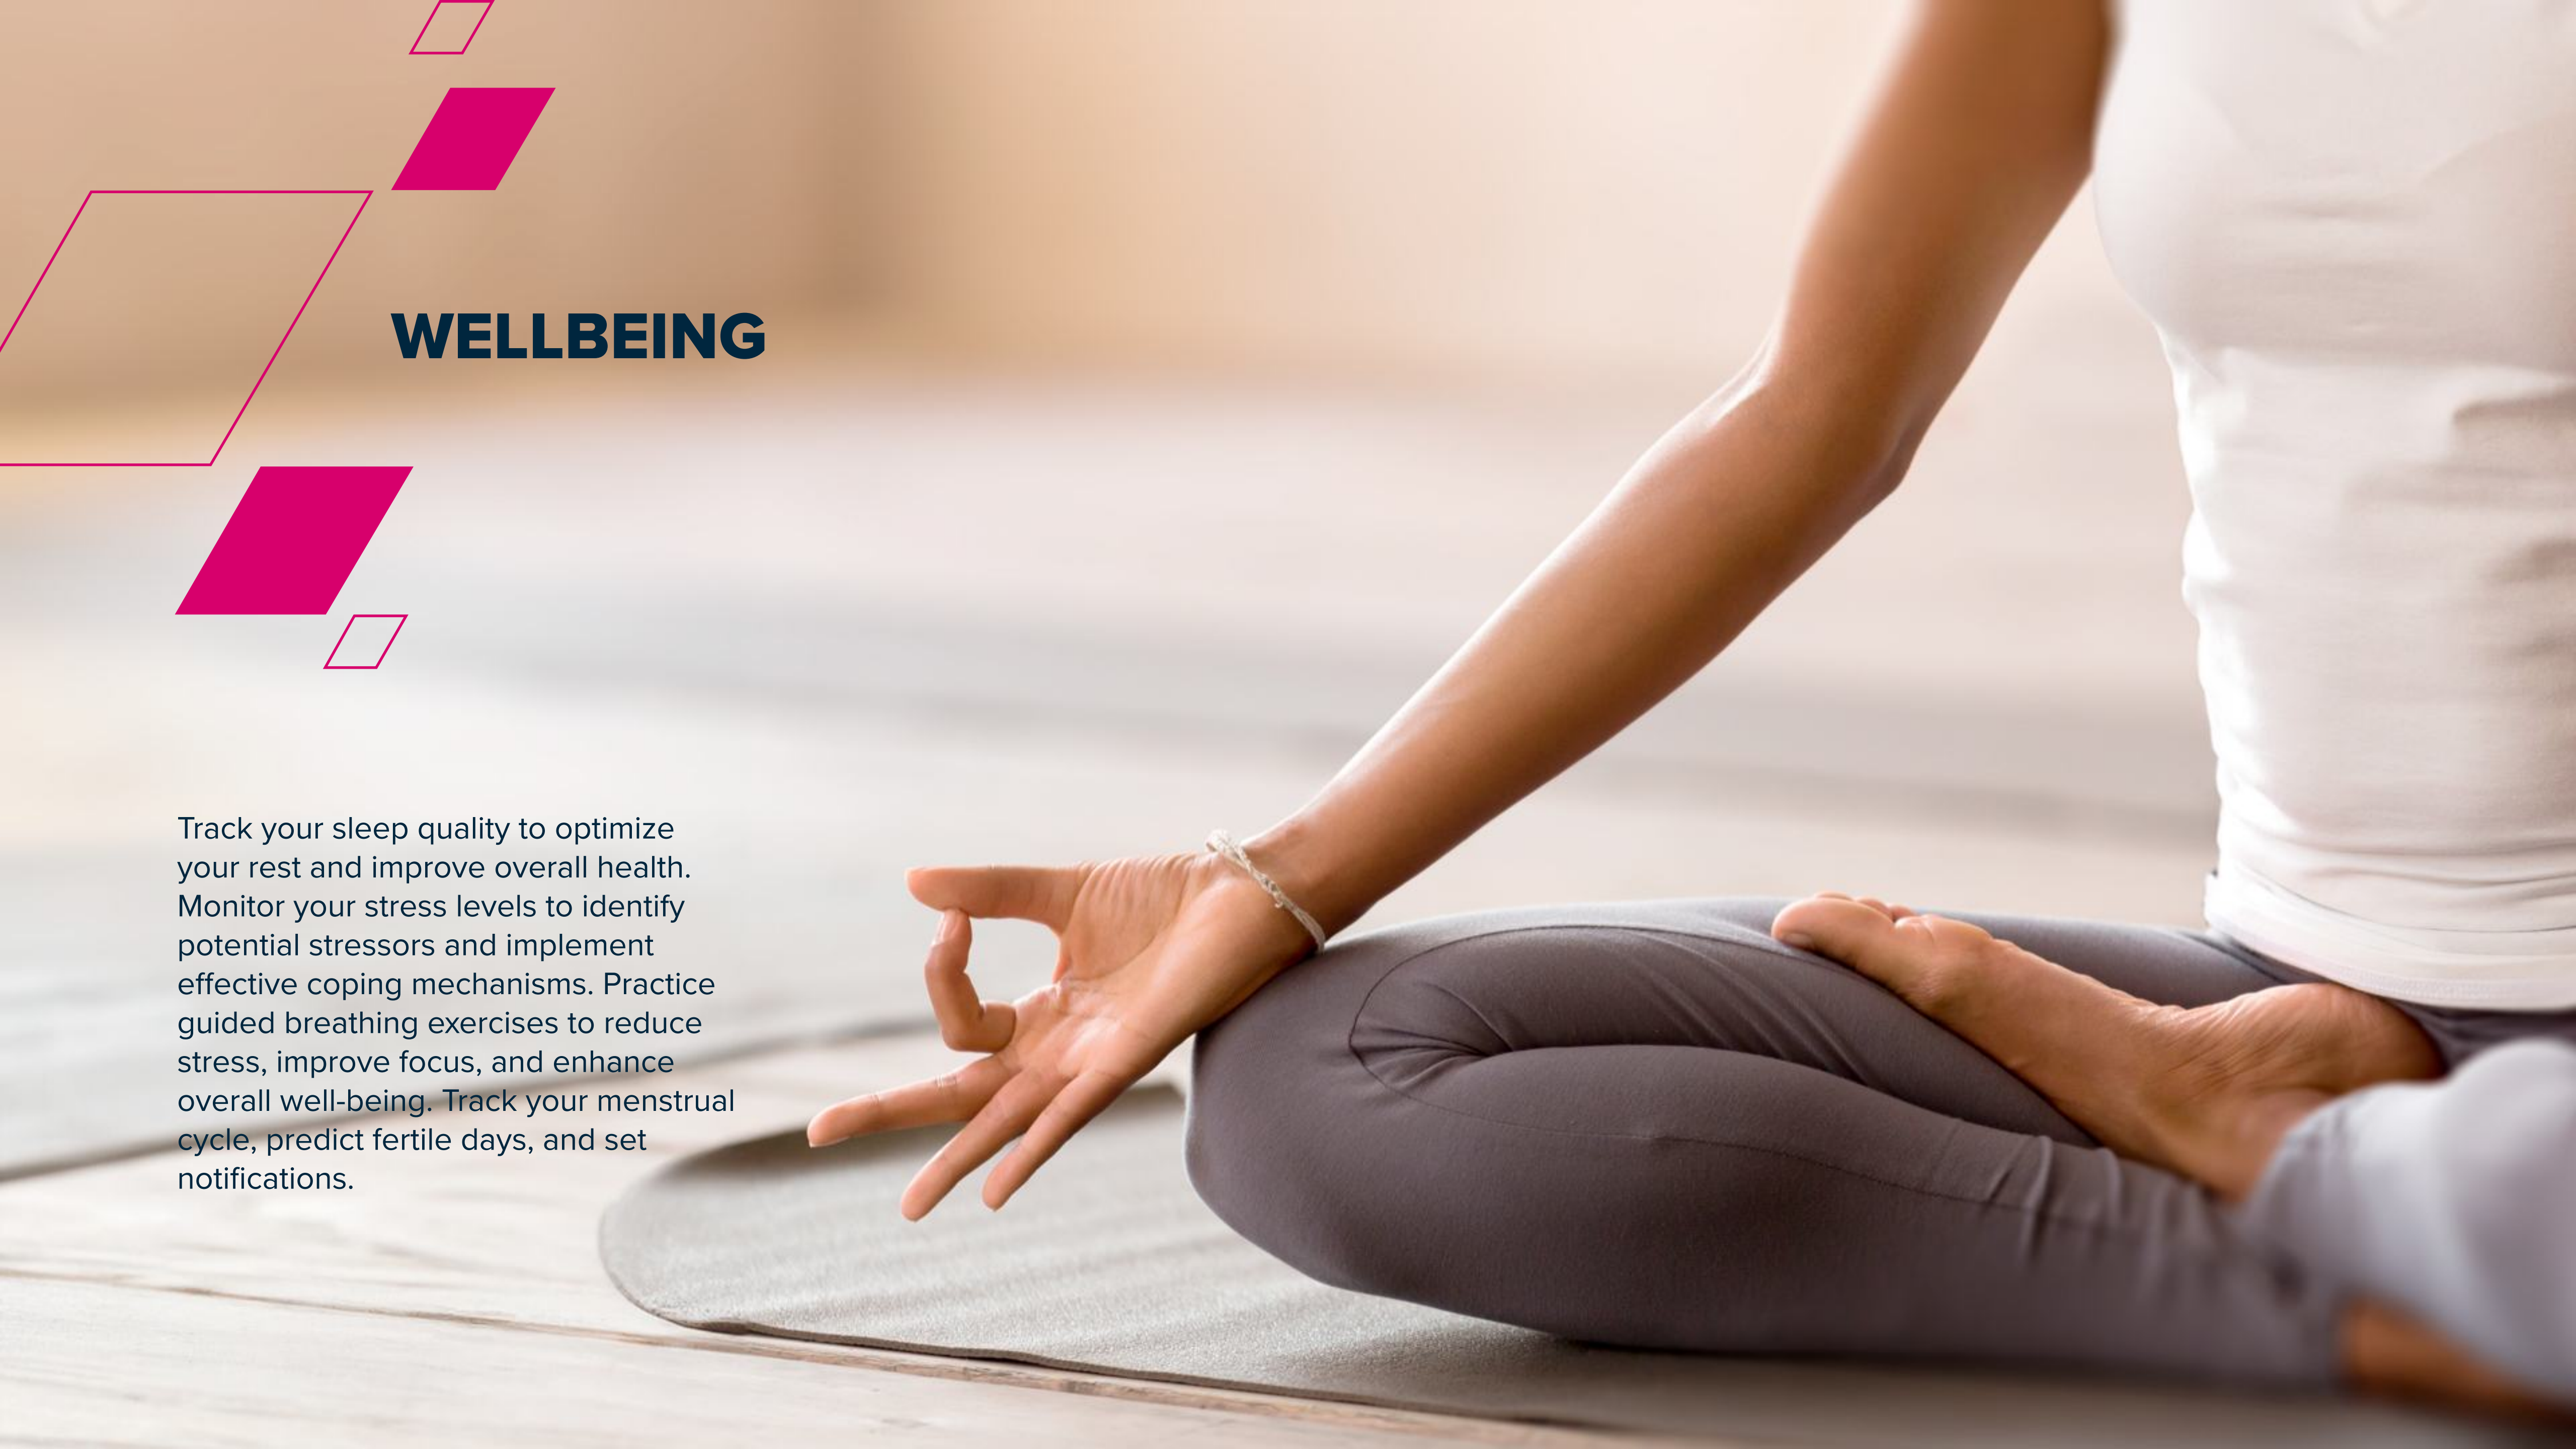

ELEVATE YOUR WORKOUT

Track your steps, distance, and calorie burn to measure your progress and set new goals. Choose from 25 sport modes and find the perfect workout for your preferences, from running and cycling to yoga and swimming. Time your workouts or activities with precision using the stopwatch function.

WELLBEING

Track your sleep quality to optimize your rest and improve overall health. Monitor your stress levels to identify potential stressors and implement effective coping mechanisms. Practice guided breathing exercises to reduce stress, improve focus, and enhance overall well-being. Track your menstrual cycle, predict fertile days, and set notifications.

STAY CONNECTED

Receive convenient push notifications for calls, messages, and social media updates directly on your wrist. Share your contact information effortlessly with a digital business card.
