Introducing the Fabric Gaming Chair Crest FCH01 – let's face it, if you're going to conquer kingdoms, climb leaderboards, or even just chat with your boss on a Zoom call, you need a chair that's more than a seat; you need a fortress of comfort and support.

First off, unlike the flimsy foam that flattens out like a pancake after one use, the original cold-molded foam holds up under pressure. Draped in high-quality fabric, the Crest FCH01 feels and looks good. The breathable material keeps you cool even during heart-pounding gaming sessions or high-stakes work projects. Plus, it's as durable as your in-game armor: ready to withstand spills or splashes and whatever else.

Let's talk backbone – the durable metal frame. This chair is tough, built to take up to 150 kg (337 lb) and never miss a beat. Sturdy, dependable, and strong enough to keep you upright even when you're on the edge of your seat. With its butterfly mechanism, you get smooth, flexible support that adapts to your every move. The adjustable backrest angle ranges from a serious 90° for focus to a near-horizontal 180° for reclines.

The 5-star nylon base keeps things balanced with quiet 50 mm casters that glide effortlessly. You'll move smoothly and silently – the only thing that should be making noise is your victory cry. Thanks to the Class-4 gas lift, you can tweak the chair height to your perfect level. No more awkward hunching over your desk!

Finally, this chair is all-in on neck and lumbar support too. The headrest and lumbar pillows will keep your posture in check and your body relaxed. They're adjustable, removable, and always ready to make your long gaming nights feel a lot less taxing on your spine.

DURABLE METAL FRAME

This chair's frame is strong, unyielding, and ready to support you through every match or work session. Designed to hold up to 150 kg (337 lb), it won't flinch even if you're throwing yourself back in celebration (or defeat).

ERGONOMIC DESIGN

This chair follows the natural curve of your spine, helping you keep backaches at bay. It's engineered to align your body; there's no need to sacrifice your health for the love of gaming or productivity. Sit back, stay upright, and let the chair do the work – it's almost like an invisible posture coach.

A close-up, slightly blurred photograph of a car seat's fabric. The fabric has a fine, woven texture and is a dark, muted color, possibly charcoal or dark grey. The lighting is soft, highlighting the texture of the material. In the background, parts of the car's interior, including a perforated mesh panel, are visible but out of focus.

COMFORTABLE SEAT

Imagine a cushion that feels just as right at hour six as it did at minute one. Thanks to the original cold-molded foam, that's exactly what you get. No squishing, no sagging, just comfort.

A close-up, low-angle shot of the underside of a chair, focusing on the gas lift mechanism. The image shows a black metal frame with a central gas lift cylinder and a lever on the left. The chair's seat is upholstered in a dark, textured fabric. The background is dark and out of focus, with a few small red lights visible. The text is overlaid on the left side of the image.

POWERFUL CLASS-4 GAS-LIFT

Height adjustments shouldn't feel like a test, making you hope the chair holds. With the powerful Class-4 gas-lift, you get reliable, smooth height adjustments that respond with a pull of the lever. Set your perfect eye level, adjust on the go, and forget the thuds of other chairs.

HIGH QUALITY FABRIC

When you're sitting for hours, you need a material that's both tough and inviting. The high-quality fabric wraps around this chair, giving a sleek look. It's the definition of elegance and endurance – game on without worrying about wear and tear.

ADJUSTABLE BACKREST

Whether you're focused or relaxed, the adjustable backrest is there to give you a perfect angle. From a 90° posture check to a 180° full-on recline, you can tailor the chair to your current mood.

LUMBAR SUPPORT

No one wants to finish a gaming session feeling exhausted. The lumbar support on this chair comes with a dedicated firm pillow. It keeps your lower back aligned and supported, so marathon gaming or workdays don't end with an appointment to the chiropractor.

HEADREST PILLOW

This cushiony feature will easily take the weight off your neck, reducing tension and adding comfort. It's quite literally your throne's crown, and it's there to remind you that your comfort comes first.

5-STARS PLASTIC BASE

The 5-star plastic base provides stability you can rely on even when the game gets intense. The base, paired with quiet PU casters, means you can move around smoothly and silently. No creaking, no sudden topples – just smooth sailing.

BUTTERFLY MECHANISM

The butterfly mechanism lets you tilt and lock into various positions. Need a slight tilt for a relaxed gaming session? Or a locked, upright posture for serious work mode? This feature provides it all, adding a touch of versatility that makes things so much better.

2D ADJUSTABLE ARMREST

The adjustable armrests move with you to keep your arms supported no matter the task. Customize their height and position to prevent wrist strain, improve your comfort, and feel like a champion even if your game isn't showing it. Comfort doesn't stop at the seat.
