

Wall Charger OnCharge 250

Power up smarter with the OnCharge 250, a compact yet high-performance wall charger designed to keep up with your fast-paced life. With dual ports – a USB Type C for ultra-fast PD charging and a USB(A) for broad compatibility – this charger enables you to power two devices at once, so there’s no need to swap cables or wait for a free outlet.

Equipped with 25W of total power, it delivers rapid, efficient charging for your latest smartphones, tablets, and more. The USB Type C port supports PPS (Programmable Power Supply), dynamically adjusting voltage and current to maximize speed while protecting battery health. Meanwhile, the USB(A) port delivers up to 18W of power, perfect for older devices or accessories.

Engineered for safety, the OnCharge 250 also features built-in protection against overvoltage, overheating, overcurrent, and short circuits, so you can charge with complete confidence. Its sleek black design pairs easily with any setup, whether at home, in the office, or on the go. No more waiting or hassle – efficient, intelligent, and reliable charging is right here, a couple clicks away.
