

# Wired mouse M-6

Introducing the M-6 Wired Mouse – here to elevate your daily computing or gaming experience, this mouse is all about effortless performance. The ergonomic shape of the M-6 is tailored for long-term comfort, so your hand will stay relaxed even during extended use. No matter the task, its design minimizes strain while maximizing control.

The M-6's optical sensor delivers up to 3200 DPI, offering unmatched accuracy for any scenario. With four adjustable DPI levels – 800, 1200, 2400, and 3200 – you can switch between precise control and rapid movement with one click of a button. Built to last, this mouse is tested for 3 million clicks, making it a durable partner. With 6 responsive buttons (left, right, scroll, DPI switch, forward, backward), you have all the functionality at your fingertips for smooth navigation and easy multitasking.

The 1.5-meter cable gives you the freedom to move without compromising on responsiveness – no lag, no interruptions. And at only 80 grams, the M-6 strikes the perfect balance between being lightweight and sturdy. Under the hood, the 125Hz polling rate and 8G acceleration make the M-6 responsive to your every movement. Its dimensions (109.5 x 72 x 40 mm) make it ideal for all hand sizes without sacrificing control.
