## **PUNCHER GM-11**

The arms muscles tend to get tired during any activity, and especially during prolonged work at the computer. To help you play restfully without excessive muscle strain, we created a mouse with a weight of only 69 grams. Weight reduction is achieved due to an innovative perforated housing and a durable cable with a novel ultra-light weave. Pixart PAW3519 optical sensor, 7 robust programmable buttons, optional parameter setting software, and macros open up extensive customization options. The shape of the mouse is suitable for both hands, and the perforation lets air cool the palms, preventing them from sweating. Mouse feet are made of high molecular weight polyethylene so that it can glide on any surface flawlessly. An excellent weapon to win in your favorite games!
