• Plug and play
• Hot swap mode
• Simultaneous connection of 2 monitors
• Apple design aesthetics and full compatibility with up-to-date MacBooks

Designed for Apple

Expand your MacBook experience by adding all needed ports in one stylish aluminum hub with seven interfaces. Designed specifically for Usb-C equipped MacBooks, this hub lets you get things done faster and more conveniently, and lets you connect two monitors to your computer at once. The hub has built-in SD and TF card readers. A USB 2.0 port will ensure connectivity and data speed up to 480 Mbps, and USB 3.0 - up to 5 Gbps. 2 HDMI ports (4K at 30Hz, Full HD 1080P at 60Hz) allow to connect monitors, and USB Type C enables fast charging from the power socket. The hub is plug-and-play, it does not require any software to operate. An important feature is its hot-swap connection switching mode. In addition, the design of this multiport hub matches Apple style aesthetics, as it is fully compatible with all up-to date devices.
